

Find out how you can save

At Gippsland Climate Change Network (GCCN) we provide independent advice on whether you are eligible for rebates, information about Government programs and connection to local products, installers and retailers that you can claim rebates on.

In addition to Victorian Energy Upgrade rebates there is a bonus of up to \$2000 for selected items across various sectors.

GCCN is working closely with Sustainability Victoria to introduce the Small Business Energy Saver Program to you and other local small businesses.

Small Business Energy Saver Program

Is my small business eligible?

If you have 19 employees or less and have a commercial (non-residential) premises you are eligible for the Program.

Rebates are available to various sectors including accommodation, retail, hospitality, healthcare and professional services, and small-scale manufacturing.

Savings for upgrading equipment

You can use bonuses to make multiple eligible upgrades, which can include:

- heat pump hot water systems
- space heating and cooling systems
- water efficient pre-rinse spray valves
- low-flow shower heads
- refrigerators and upright freezers
- refrigerated display cabinets
- fan motors in refrigeration systems.

What are the benefits?

Lower energy use

Lower energy bills – up to 20% annually

Lower greenhouse gas emissions

Lower (subsidised) cost of the upgrade (cost of ownership)

Generate employment for local trades and retailers
